

City tour-Kangerlussuaq

Join us on a city tour of the nearby city and area, and experience the distinctive buildings of the American base, as well as the normal Greenlandic building style, with church and museum. Along the way you will be informed about life in the city, then and now.

We drive to the Harbor and Kellyville, which offers a 13 km long drive in a stunning scenery and arctic wildlife.

In clear weather there will be an opportunity to see the icecab and trekking track of Sisimiut, also referred to as the Arctic Circle Trail.

Duration: apr. 2 hours

KANG MINI TOURS Kangerlussuaq

Welcome to Greenland

We arrange several tours of different duration in our beautiful natural area.

City tour-Kangerlussuaq
Tacan - Tundra tour
Russell - Glacier
The ice sheet Point 660
Northern Lights tour

Kangerlussuaq and the 170 km long fjord, inlet, share the same name as "big fjord". The polar circle crosses the fjord about halfway.

Kangerlussuaq was founded in 1941 when an American air base was built. The Americans remained in the area until 1992. The Kangerlussuaq Museum tells about the history of the countryside, as an American base area and about the time thereafter. Kangerlussuaq has more than 300 uncloudy days a year, making it one of the best in Greenland where you can experience the northern lights. These can be seen in Kangerlussuaq from October to April.

Today, approximately 540 inhabitants live in Kangerlussuaq

The Kangerlussuaq area is known for its stable climate with dry air, frosty winter days and a stunning scenery. So indulge yourself and your family and dear with an experience beyond the usual in Greenland.

Tacan - Tundra tour

On this trip to Tacan that crosses the Black Ridge, the mountain south of the city, we get up through the amazing Greenlandic tundra, with the opportunity to experience both musk oxen and reindeer. From the Salt Lake there is a great view of the tundra with the icecab in the background.

Duration: apr. 1½ hours
Obtain offer by phone +299 540107
Minimum 4 prs.

Russel-Glacier

In a partly off-road terrain, we drive out to Langsøen (the Long Lake), and from here we cross the terrain to the Russell Glacier.

With the, up to 60m vertical wall, it's an impressive sight one will never forget and in summer you can be lucky to see the ice quays.

We come close to, and can take amazing pictures and videos of this natural phenomenon.

During the road it will be possible to experience wildlife closely, and possibly see both musk oxen, reindeer and snow hairs.

The trip requires that the participants are in a good condition to climb the wild terrain with medium-sized increases.

Duration: apr. 4 hours

Minimum 4 prs.

The ice sheet Point 660

An amazing and unforgettable trip through Kangerlussuaq's 4-wheel drive outback, which is the only possibility to drive in this unique landscape, with the ability to spot reindeer, musk oxen and many different birds and flowers, according to the season.

By road we pass Langsøen (Long Lake), which is over 10 km long, and we pass the lake where the special water tomatoes grow. The Sandflugts Valley passes and is perceived as driving in the desert, and the road continues and gives new amazing experiences overlooking the Russel glacier before reaching the moraine which gives access to the ice sheet itself at Point 660. Here we have to go on the ice and realize how magnificent the icecab is in reality.

This is a natural experience of the very rare ones that will recall.
